

Minor surface water flooding impacts are possible but not expected in parts of England and Wales on Tuesday and Wednesday. The overall flood risk is VERY LOW.

### Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Minor surface water flooding impacts are possible but not expected in parts of England and Wales on Tuesday and Wednesday.

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

## Groundwater

The groundwater flood risk is VERY LOW for the next five days.

The level of the ongoing disruption caused by groundwater flooding in the South of England is not forecast to get worse, the flooding is being managed and awareness is high. Consequently the groundwater flood risk is VERY LOW.

The river flood risk is VERY LOW for the next five days.

The coastal/tidal flood risk is VERY LOW for the next five days.

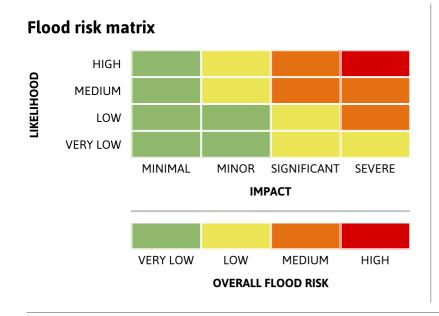

# Flood Guidance Statement

10:30hrs Monday 29 April 2024

A working partnership between

Agency

## Summary of potential impacts

#### MINIMAL

Isolated and minor flooding of low-lying land and roads Isolated spray/wave on coastal promenades Little or no disruption to travel, but wet road surfaces

#### MINOR

Localised flooding of land and roads Flooding affecting individual properties Disruption to travel and key sites in flood plans

#### SIGNIFICANT

Flooding affecting parts of communities Possible danger to life and damage to buildings/structures Disruption to travel and key sites in flood plans

#### SEVERE

Danger to life, severe disruption to travel Widespread flooding affecting whole communities Widespread disruption or loss of infrastructure Large scale evacuation of properties possible

Next statement due 10:30hrs Tuesday 30 April 2024 (all times are local)
