

Minor surface water flooding impacts are probable today (Monday) across parts of South Wales and South West England. The overall flood risk is LOW.

### Specific Areas of Concern Map 1 - Monday 13 May 2024

# Flood Guidance Statement

10:30hrs Monday 13 May 2024

#### Assessment of flood risk

Surface water

The surface water flood risk is LOW today (Monday).

Minor surface water flooding impacts are probable today across parts of South Wales and South West England. See Specific Areas of Concern Map.

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

## Groundwater

The groundwater flood risk is VERY LOW for the next five days.

The level of the ongoing disruption caused by groundwater flooding in the South of England is not forecast to get worse, the flooding is being managed and awareness is high. Consequently the groundwater flood risk is VERY LOW.

Rivers

The river flood risk is VERY LOW for the next five days.

## Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

## Flood Guidance Statement

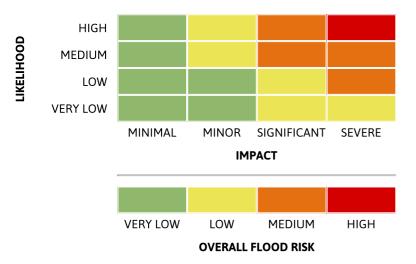

10:30hrs Monday 13 May 2024

### Flood risk matrix

### **Summary of potential impacts**

#### MINIMAL

Isolated and minor flooding of low-lying land and roads Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

#### **MINOR**

Localised flooding of land and roads Flooding affecting individual properties Disruption to travel and key sites in flood plans

#### **SIGNIFICANT**

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

#### **SEVERE**

Danger to life, severe disruption to travel Widespread flooding affecting whole communities Widespread disruption or loss of infrastructure Large scale evacuation of properties possible

Next statement due 10:30hrs Tuesday 14 May 2024 (all times are local)
