

Minor surface water flooding impacts are possible but not expected across parts of England on Friday. The overall flood risk for England and Wales is VERY LOW for the next five days.

Assessment of flood risk

The surface water flood risk is VERY LOW for the next five days.

Minor surface water flooding impacts are possible but not expected across parts of England on Friday due to a very low risk of heavy, possibly thundery showers developing over the near continent and spreading north.

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

The river flood risk is VERY LOW for the next five days.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

The groundwater flood risk is VERY LOW for the next five days.
