Steady

Minor river flooding impacts are possible but not expected in parts of the Midlands and the South of England today. The overall flood risk is VERY LOW.

Assessment of flood risk

Rivers

The river flood risk is VERY LOW for the next five days.

Minor river flooding impacts are possible but not expected in parts of the Midlands and the South of England today (Thursday), due to recent heavy rain.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Minimal coastal flooding impacts are expected along parts of the East Coast today (Thursday) due to strong winds generating large shoreward directed waves, which may lead to overtopping.

Surface water

The surface water flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

10:30hrs Thursday 10 October 2024

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
