## Assessment of flood risk

### Rivers

The river flood risk is MEDIUM today (Sunday) and tomorrow and LOW on Wednesday.

Significant river flooding impacts are expected in parts of England and Wales today and tomorrow following heavy rainfall from Storm Bert. Minor river flooding is possible more widely across England and Wales, which may continue in places until Tuesday. See Specific Areas of Concern Maps.

Minor river flooding impacts are also possible but not expected across parts of England on Wednesday due to further heavy rain.

### Surface water

The surface water flood risk is LOW today (Sunday).

Significant surface water flooding is possible in parts of England today due to heavy rain. Minor surface water flooding is possible more widely across England and Wales. See Specific Areas of Concern Maps.

Minor surface water flooding impacts are also possible but not expected across parts of England on Wednesday due to further heavy rain.

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

### Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.
