Assessment of flood risk

Rivers

The river flood risk is MEDIUM for today (Tuesday).

Ongoing significant river flooding impacts are probable in Leicestershire today, with minor river flooding impacts probable in other parts of England and Wales, continuing through to Thursday for some larger rivers. This is due to recent heavy rain combined with melting snow. See Specific Areas of Concern Maps.

Minor river flooding impacts are possible but not expected in the south of England from Tuesday to Thursday.

Surface water

The surface water flood risk is VERY LOW for the next five days.

Minor surface water flooding impacts are possible but not expected in parts of the south of England on Wednesday and Thursday.

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Localised groundwater flooding impacts are possible but not expected from Friday onwards in parts of Dorset, Wiltshire and Hampshire.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.
