Steady

Minor flooding is possible but not expected in parts of the North of England from rivers on Monday and Tuesday and parts of the South of England from groundwater for the next five days. The overall flood risk is VERY LOW.

Assessment of flood risk

Rivers

The river flood risk is VERY LOW for the next five days.

Minor river flooding impacts are possible but not expected from combined rainfall and snowmelt on Monday and into Tuesday across parts of the North of England.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Localised minor groundwater flooding impacts are possible but not expected for the next five days in parts of the South of England.

Surface water

The surface water flood risk is VERY LOW for the next five days.

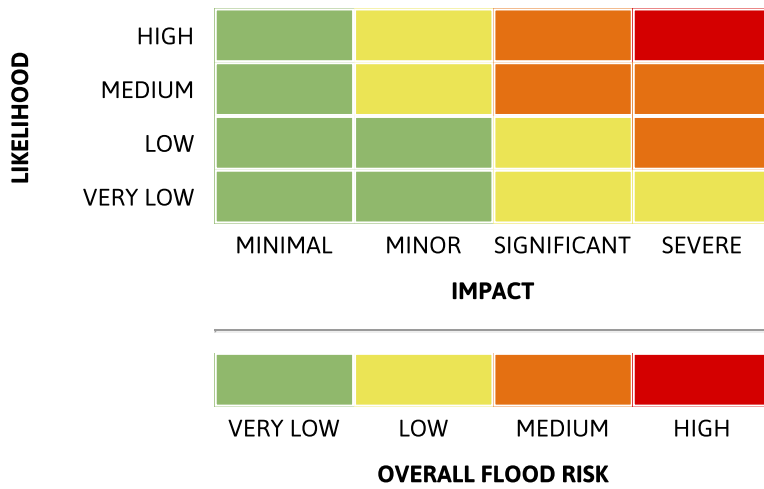

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Flood Guidance Statement

10:30hrs Sunday 12 January 2025

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
