Increased

Minor flooding impacts are possible but not expected in parts of the North of England from rivers today (Tuesday) and in parts of the South of England from groundwater for the next five days. The overall flood risk is VERY LOW.

## Assessment of flood risk

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Localised minor groundwater flooding impacts are possible but not expected for the next five days in parts of the South of England.

### Rivers

The river flood risk is VERY LOW for the next five days.

Minor river flooding impacts are possible but not expected from snowmelt today (Tuesday) across parts of the North of England.

### Surface water

The surface water flood risk is VERY LOW for the next five days.

### Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

# Flood Guidance Statement

10:30hrs Tuesday 14 January 2025

## Flood risk matrix

## Summary of potential impacts

### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible
