Assessment of flood risk

Surface water

The surface water flood risk is LOW on Sunday.

Significant surface water flooding impacts are possible in parts of South Wales on Sunday, with minor impacts also probable in the South West of England and possible in the North West of England due to heavy and persistent rain. See Specific Areas of Concern Map.

More widely, minor surface water flooding impacts are possible but not expected across England and Wales on Sunday.

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

Rivers

The river flood risk is LOW on Sunday.

Significant river flooding impacts are possible in parts of South Wales on Sunday.

Minor river flooding impacts are also possible in parts of the North West of England, and possible but not expected more widely across England and Wales, due to heavy and persistent rain on Sunday. See Specific Areas of Concern Map.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.
