Steady

Significant surface water impacts are possible today (Saturday), and possible but not expected on Sunday and Monday due to heavy showers and thunderstorms. The overall flood risk for England and Wales is LOW from today through Monday.

## Specific Areas of Concern Map 1 - Saturday 19 July 2025

### RISK AREA A

Impact **SIGNIFICANT**

Likelihood **LOW**

Source River Surface  
Likely duration 1 Day

Significant surface water impacts possible due to heavy showers and thunderstorms.

### RISK AREA B

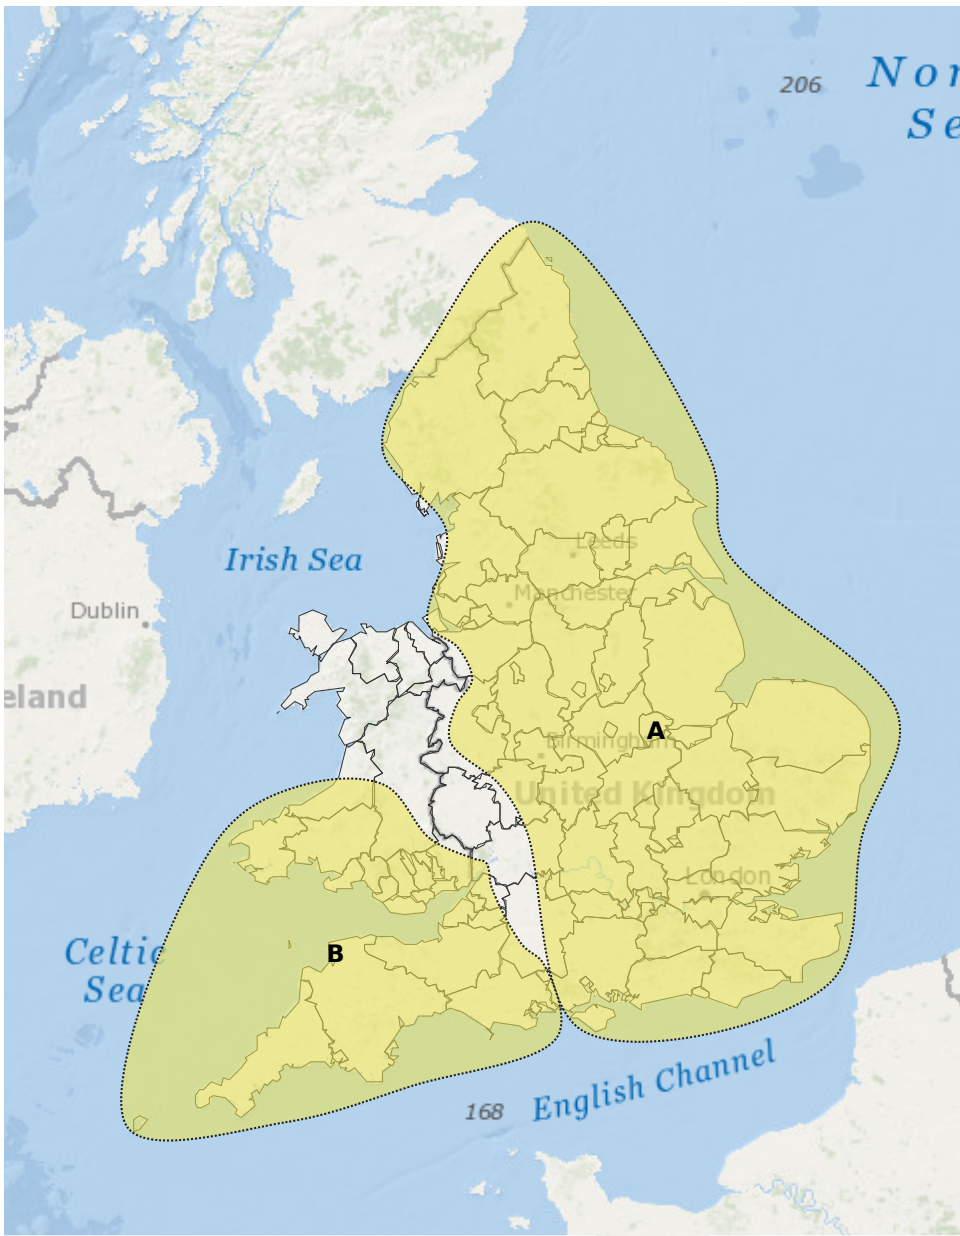

Impact **SIGNIFICANT**

Likelihood **VERY LOW**

Source Surface  
Likely duration 2 Days

Slow moving thunderstorms from Sat evening and during Sunday.

# Flood Guidance Statement

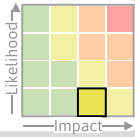

10:30hrs Saturday 19 July 2025

## Specific Areas of Concern Map 2 - Sunday 20 July 2025

**RISK AREA B**

Impact **SIGNIFICANT**

Likelihood **VERY LOW**

Source Surface

Likely duration 2 Days

Slow moving thunderstorms from Sat evening and during Sunday.

**RISK AREA D**

Impact **MINOR**

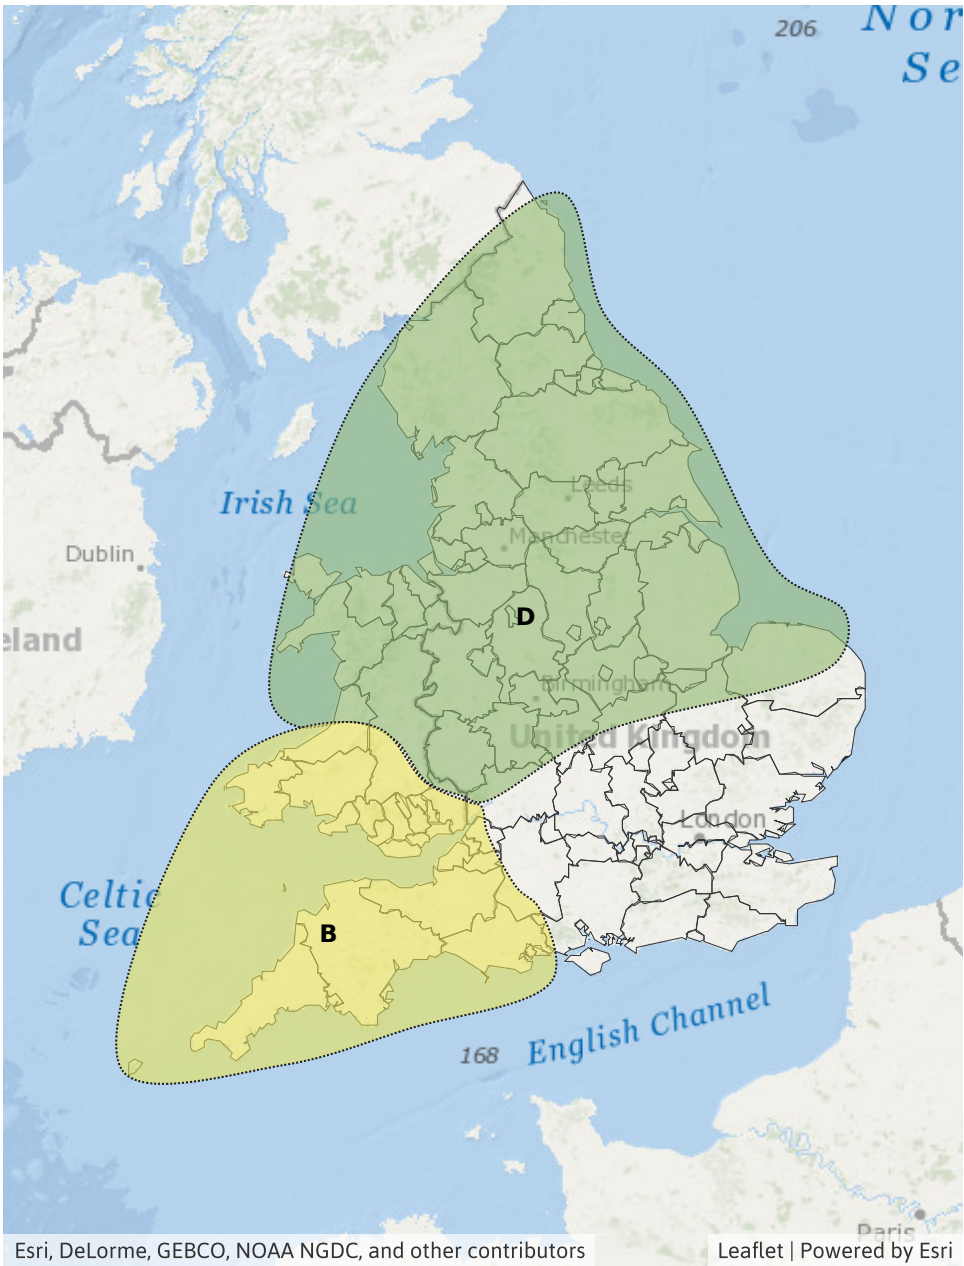

Likelihood **LOW**

Source Surface

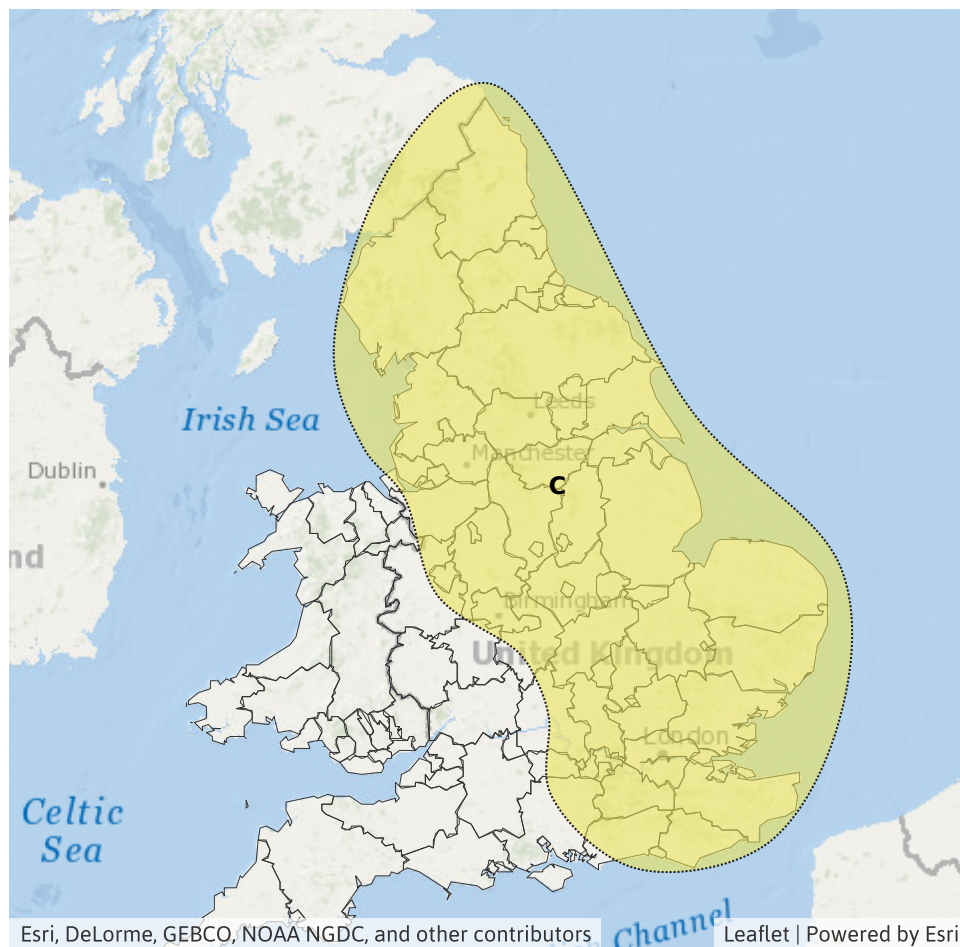

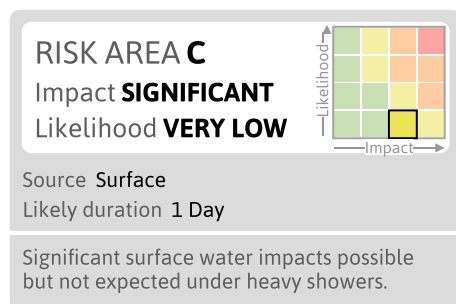

Likely duration 1 Day

Heavy showers and thunderstorms may generate surface water impacts.

10:30hrs Saturday 19 July 2025

### Specific Areas of Concern Map 3 - Monday 21 July 2025

## Assessment of flood risk

### Surface water

The surface water flood risk is LOW from today (Saturday) through Monday.

Significant surface water flooding impacts are possible across much of England today due to heavy showers and thunderstorms.

Significant surface water flooding impacts are also possible but not expected in parts of South West England on Sunday, with minor impacts possible more widely across parts of the Midlands and North of England, and Wales.

Significant surface water impacts are possible but not expected again on Monday across much of England, due to slow moving heavy showers and thunderstorms.

See Specific Areas of Concern Maps for further details.

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

### Rivers

The river flood risk is VERY LOW for the next five days.

Isolated minor river impacts are possible but not expected today (Saturday) due to heavy showers and thunderstorms. See Specific Areas of Concern Map 1 for further details.

### Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

- MINIMAL**  
Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces
- MINOR**  
Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans
- SIGNIFICANT**  
Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans
- SEVERE**  
Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible
