Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Minor surface water impacts are possible in parts of Wales on Sunday due to widespread rain which may be heavy in places.

Minor surface water flooding impacts are possible but not expected in parts of England and Wales from Sunday until Wednesday due to several unsettled periods of weather.

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

Rivers

The river flood risk is VERY LOW for the next five days.

Minor river flooding impacts are possible in parts of Wales on Sunday due to widespread rain which may be heavy in places.

Minor river flooding impacts are possible but not expected in parts of England and Wales on Wednesday due to a risk of heavy and persistent rain falling on wet catchments.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.
