## Assessment of flood risk

### Surface water

The surface water flood risk is MEDIUM on Sunday and Monday.

Significant surface water flooding impacts are probable in parts of the North West of England on Sunday and Monday and possible more widely across England and Wales from today to Monday.

Minor surface water flooding impacts are also possible from today until Tuesday across parts of England and Wales, and possible but not expected more widely.

See Areas of Concern Maps for more details.

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

### Rivers

The river flood risk is MEDIUM on Sunday and Monday.

Significant river flooding impacts are probable in parts of the North West of England and possible more widely on Sunday and Monday.

Minor river flooding impacts are possible elsewhere across parts of the North of England and Wales, and possible but not expected more widely today until Tuesday.

Minor river flooding impacts are expected along parts of the River Severn in England until Sunday.

See Areas of Concern Maps for details.

### Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.
