Flood Guidance Statement

10:30hrs Wednesday 24 December 2025

Specific Areas of Concern Map 2 - Wednesday 24 December 2025

RISK AREA B
Impact **MINOR**
Likelihood **LOW**

Source Ground
Likely duration 5 + Days

Groundwater flooding impacts, with the situation stabilising from Thursday.

Assessment of flood risk

Rivers

The river flood risk is VERY LOW for the next five days.

Minor river flooding impacts are possible from the River Ritec in Tenby, Pembrokeshire until Friday. See Areas of Concern Map for details.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Minor groundwater flooding impacts are possible in parts of North Yorkshire today (Wednesday). See Areas of Concern Map for details. From Thursday, groundwater flooding impacts in North Yorkshire are not forecast to get worse, and any flooding will be managed locally with awareness expected to be high.

Minor groundwater flooding impacts are possible but not expected in other parts of England from today until Friday. From Saturday, groundwater flooding impacts in Dorset are not forecast to get worse, and any flooding will be managed locally with awareness expected to be high.

Surface water

The surface water flood risk is VERY LOW for the next five days.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

- MINIMAL**
