Increased

Minor coastal flooding impacts are possible but not expected from Thursday until Saturday for some coasts of England. The overall flood risk for England and Wales is VERY LOW for the next five days.

## Assessment of flood risk

### Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Minor coastal flooding impacts are possible but not expected from Thursday until Saturday for some coasts of England. This is due to storm surge and large waves in the North Sea.

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.

There are ongoing minor groundwater flooding impacts in North Yorkshire and Dorset over the next four days. However the level of disruption is being managed locally and awareness is high. Consequently, the groundwater flood risk is being assessed as VERY LOW.

### Rivers

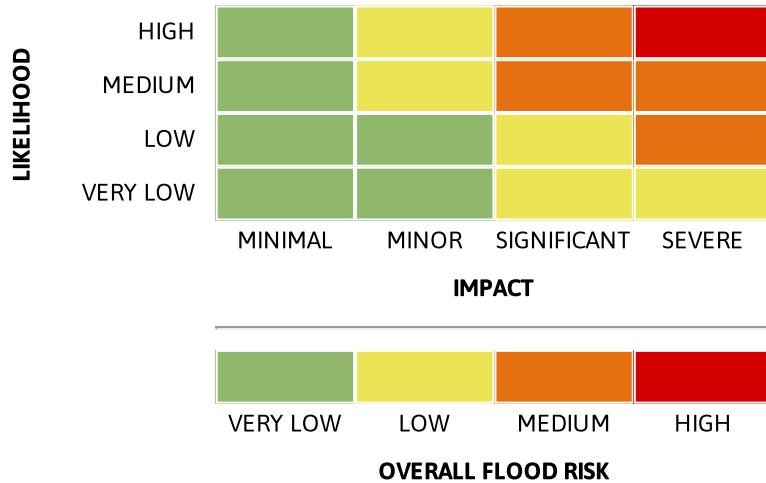

The river flood risk is VERY LOW for the next five days.

### Surface water

The surface water flood risk is VERY LOW for the next five days.

## Flood risk matrix

## Summary of potential impacts

### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible
