Significant river flooding impacts are probable today in parts of England, and possible elsewhere in England and Wales. Significant flood impacts are possible but not expected in parts of England on Thursday. The overall flood risk is MEDIUM. See 6-10 day section.

Specific Areas of Concern Map 1 - Tuesday 27 January 2026

RISK AREA A

Impact **SIGNIFICANT**
Likelihood **MEDIUM**

Source River

Likely duration 1 Day

Ongoing river impacts from recent heavy rain

RISK AREA B

Impact **SIGNIFICANT**
Likelihood **LOW**

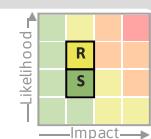

Source River

Likely duration 1 Day

Elevated river levels following heavy rain

RISK AREA C

Impact **MINOR**
Likelihood **MEDIUM**

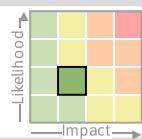

Source River Surface

Likely duration 1 Day

Ongoing inland flooding impacts

RISK AREA E

Impact **MINOR**
Likelihood **LOW**

Source River

Likely duration 1 Day

Recent heavy rain may cause river flooding

RISK AREA F

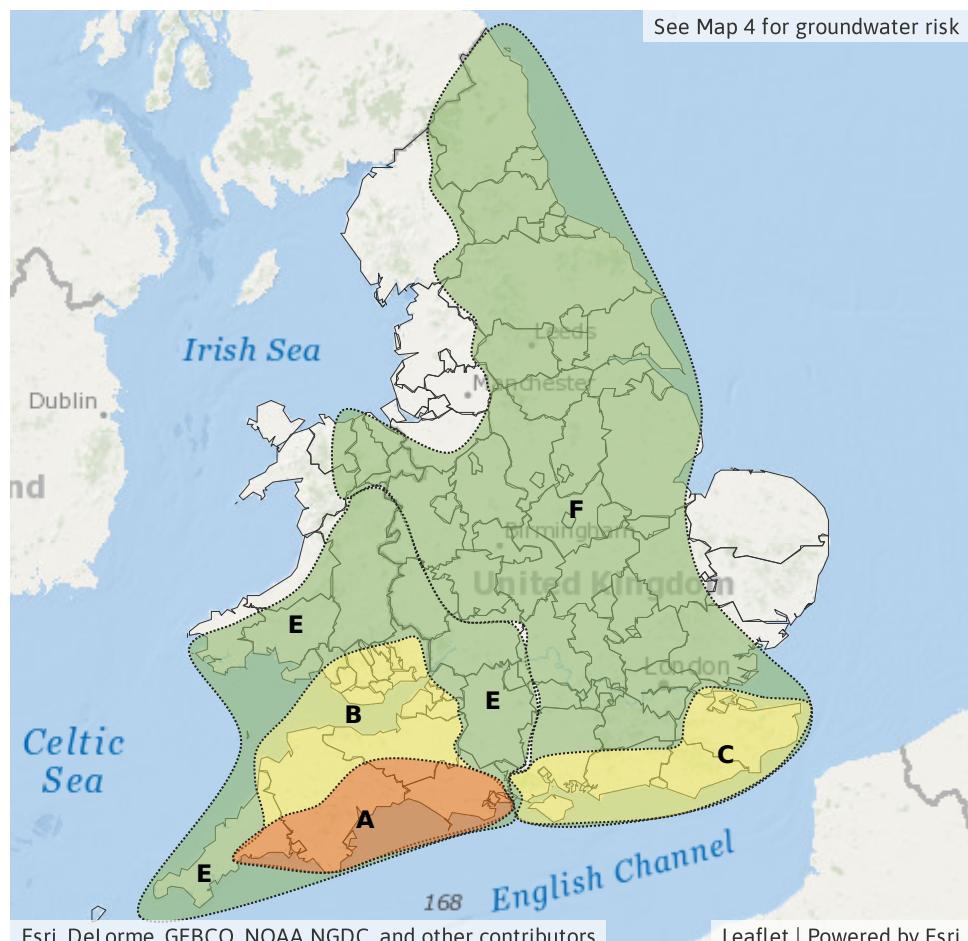

Impact **MINOR**
Likelihood **LOW**

Source River Surface

Likely duration 1 Day

Ongoing inland flooding impacts

RISK AREA G

Impact **MINOR**
Likelihood **LOW**

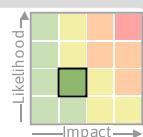

Source River

Likely duration 2 Days

Ongoing high river levels from previous heavy rain

RISK AREA H

Impact **MINOR**
Likelihood **LOW**

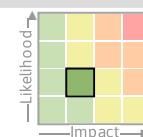

Source River

Likely duration 1 Day

Ongoing river risk on Wednesday

RISK AREA J

Impact **MINOR**
Likelihood **LOW**

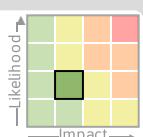

Source River

Likely duration 2 Days

Residual river flooding risk on Wednesday and Thursday

RISK AREA K

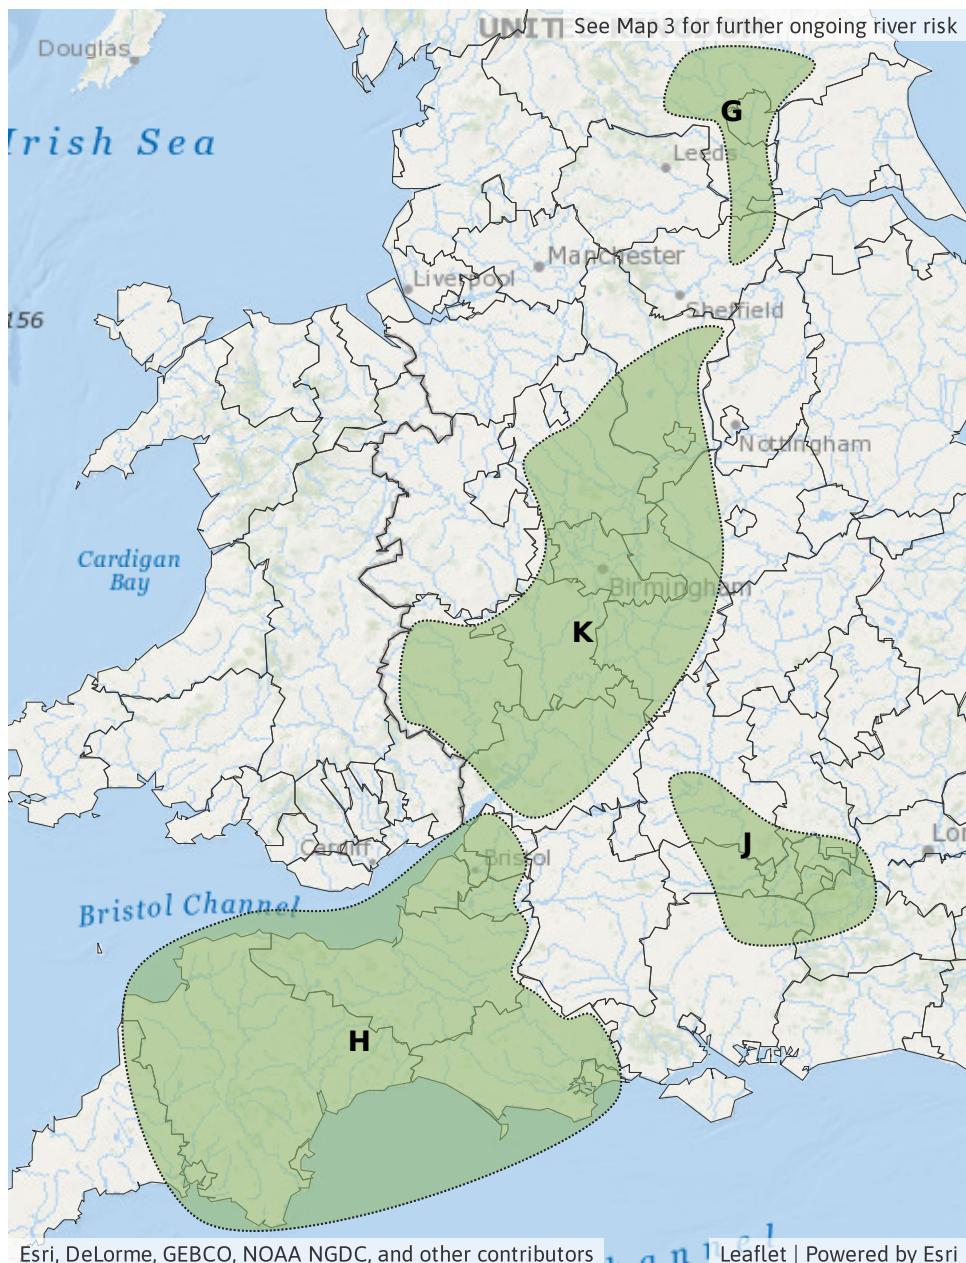

Impact **MINOR**
Likelihood **LOW**

Source River

Likely duration 3 Days

Ongoing residual river risk from Wednesday to Friday

RISK AREA D

Impact **SIGNIFICANT**
Likelihood **VERY LOW**

Source River Surface
Likely duration 1 Day

Heavy rain on Thursday may cause inland flooding.

RISK AREA G

Impact **MINOR**
Likelihood **LOW**

Source River
Likely duration 2 Days

Ongoing high river levels from previous heavy rain

RISK AREA I

Impact **MINOR**
Likelihood **LOW**

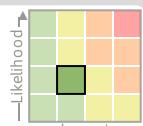

Source River Surface
Likely duration 2 Days

Possible inland flood risk Thursday and Friday due to heavy rain on wet catchments

RISK AREA J

Impact **MINOR**
Likelihood **LOW**

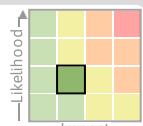

Source River
Likely duration 2 Days

Residual river flooding risk on Wednesday and Thursday

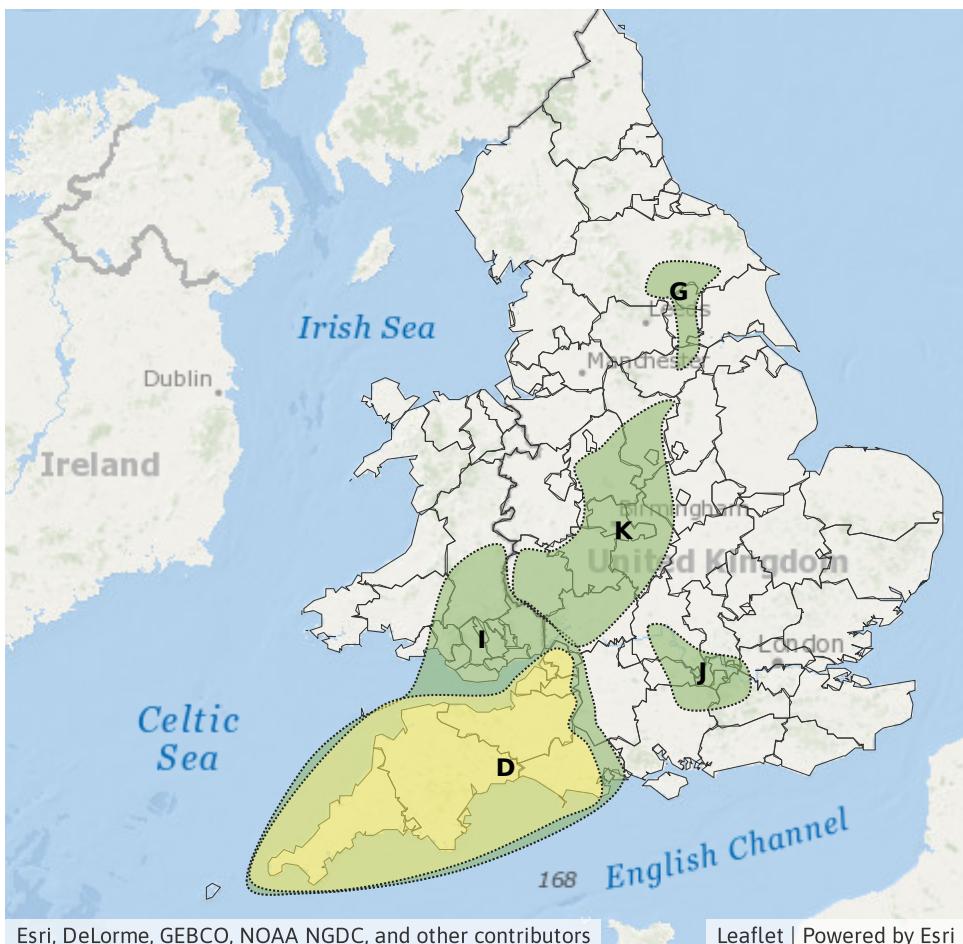

RISK AREA K

Impact **MINOR**
Likelihood **LOW**

Source River
Likely duration 3 Days

Ongoing residual river risk from Wednesday to Friday

Assessment of flood risk

Rivers

The river flood risk is MEDIUM today (Tuesday).

Significant river flooding impacts are probable in parts of England and possible in parts of Wales today.

Significant river flooding impacts are also possible but not expected in parts of England on Thursday.

Minor river flooding impacts are probable in parts of England today and possible more widely in parts of England and Wales from today until Friday.

See Areas of Concern Maps.

Surface water

The surface water flood risk is LOW today (Tuesday) and Thursday.

Minor surface water flooding impacts are probable in parts of England today, and possible more widely in parts of England and Wales.

Significant surface water flooding impacts are possible but not expected for parts of England on Thursday.

Minor surface water flooding impacts are possible again on Thursday and Friday in parts of England.

See Areas of Concern Maps.

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Minor groundwater flooding impacts are possible from today (Tuesday). See Areas of Concern Maps.

Coastal/Tidal

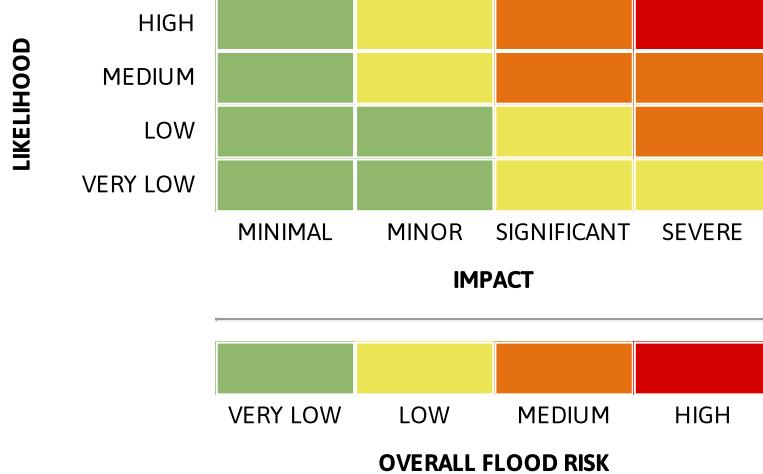

The coastal/tidal flood risk is VERY LOW for the next five days.

Minor coastal impacts are possible but not expected along some English coasts today (Tuesday) due to storm surge and large waves. Impacts may include isolated spray on low-lying roads and coastal promenades.

6-10 day forecast

Unsettled conditions are expected to continue with further low pressure systems from the southwest. Areas that have seen the most rainfall recently are those most likely to see further heavy rain during this period. This could lead to significant inland flooding impacts.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
