## Specific Areas of Concern Map 2 - Monday 2 and Tuesday 3 February 2026

### RISK AREA D

Impact **SIGNIFICANT**  
Likelihood **VERY LOW**

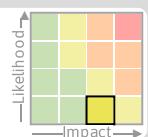

Source River Surface  
Likely duration 2 Days

Persistent and heavy rain may lead to significant flooding impacts.

### RISK AREA E

Impact **SIGNIFICANT**  
Likelihood **VERY LOW**

Source Surface

Likely duration 2 Days

Significant surface water flooding impacts possible but not expected due to heavy rain.

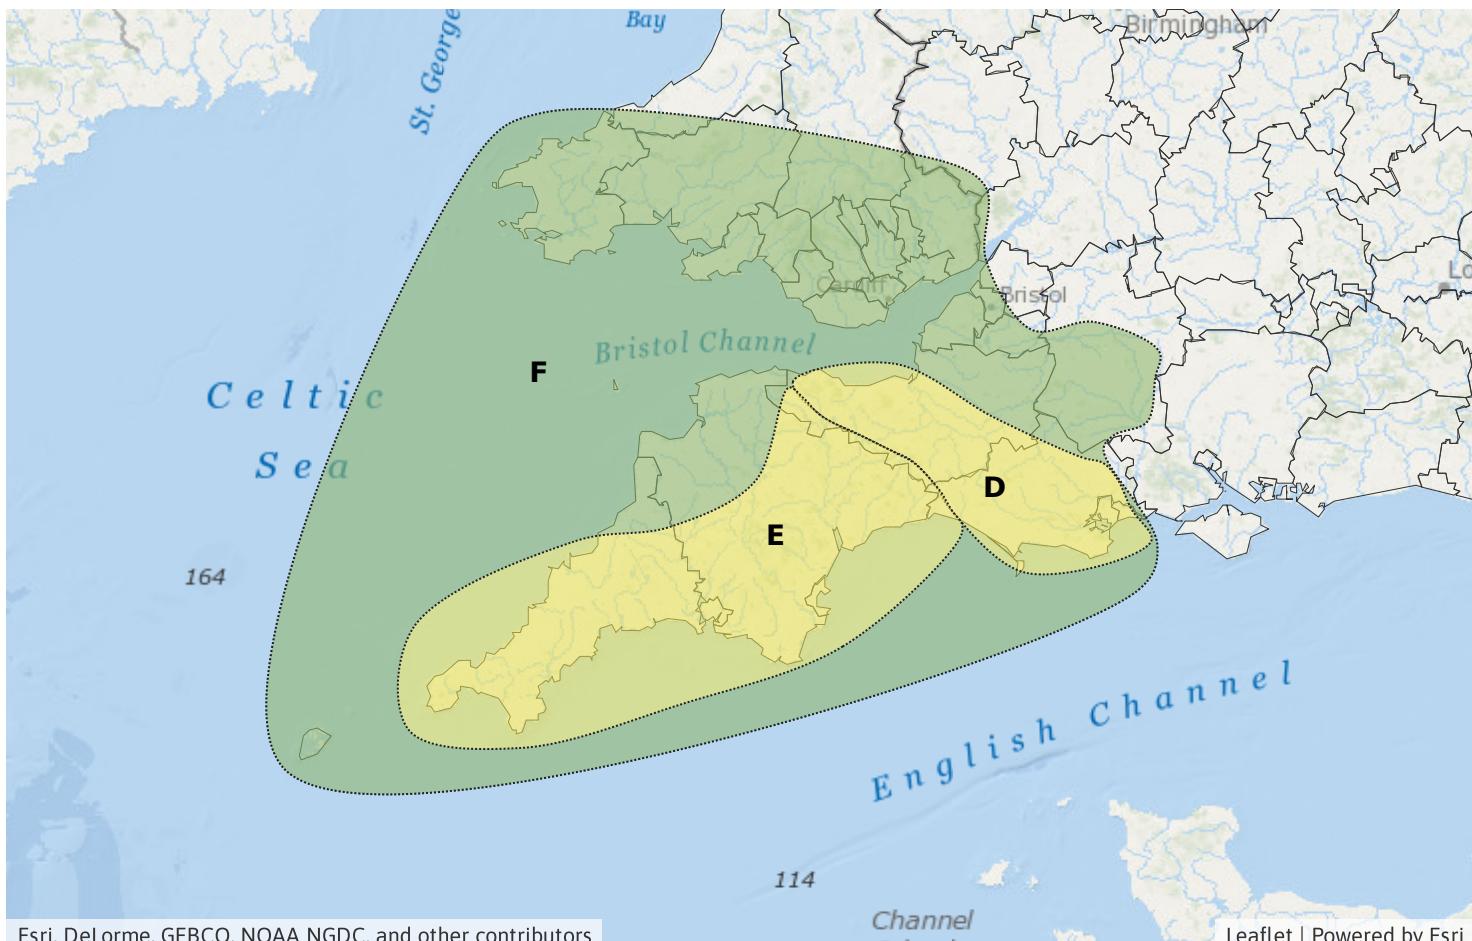

### RISK AREA F

Impact **MINOR**  
Likelihood **LOW**

Source River Surface  
Likely duration 2 Days

Persistent and heavy rain may lead to flooding impacts.

Esri, DeLorme, GEBCO, NOAA NGDC, and other contributors

## Assessment of flood risk

### Groundwater

The groundwater flood risk is MEDIUM for the next five days.

Significant groundwater flooding impacts are probable in parts of Dorset and Wiltshire, with minor impacts possible more widely for the next five days.

See Areas of Concern Maps.

### Rivers

The river flood risk is LOW for the next five days.

Ongoing significant river flooding impacts are possible but not expected in the Somerset Levels for the next five days.

Significant river impacts are also possible in the South West of England on Monday and Tuesday due to new rainfall, which may be heavy, with minor impacts possible more widely in parts of England and Wales.

On Thursday, minor river flooding impacts are again possible in the South West of England.

See Areas of Concern Maps.

Minor river flooding impacts are also possible but not expected across parts of England today (Sunday).

### Surface water

The surface water flood risk is LOW on Monday and Tuesday.

Significant surface water flooding impacts are possible but not expected for parts of the South West of England on Monday and Tuesday, with minor impacts possible more widely across England and Wales.

Minor surface water flooding impacts are again possible on Thursday.

See Areas of Concern Maps.

Minor surface water flooding impacts are also possible but not expected across parts of England today (Sunday).

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

### Coastal/Tidal

The coastal/tidal flood risk is LOW on Tuesday and Wednesday.

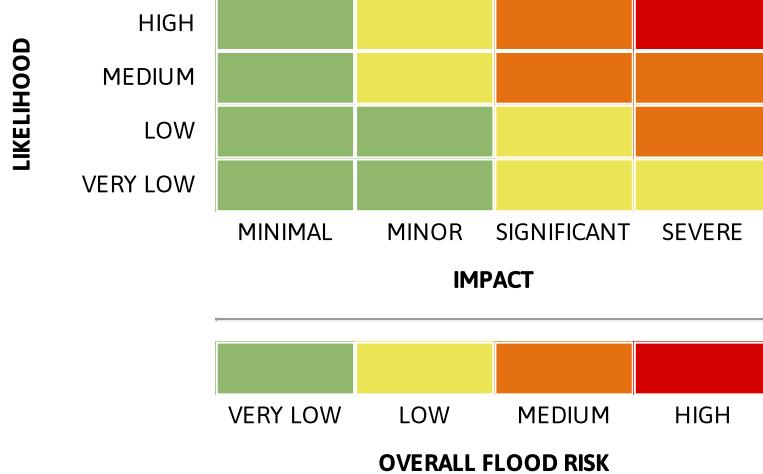

Minor coastal/tidal flooding impacts are probable expected along parts of the South West coast of England on Tuesday and Wednesday. Minor coastal/tidal flooding impacts are possible around the North East coast of England from Monday, and around parts of the South West coast of England from Tuesday, with minor impacts possible but not expected more widely for England and Wales.

See Areas of Concern Maps.

## 6-10 day forecast

Unsettled conditions are expected to continue with further low pressure systems from the southwest. Areas that have seen the most rainfall recently are those most likely to see further heavy rain during this period. This could lead to significant flooding impacts at times.

### Flood risk matrix

### Summary of potential impacts

#### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

#### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

#### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

#### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible

Next statement due **10:30hrs Monday 02 February 2026 (all times are local)**
