The overall flood risk for England and Wales is VERY LOW for the next five days.

## Assessment of flood risk

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.

There are ongoing minor groundwater flooding impacts in the south of England. The level of ongoing disruption is being managed locally and awareness is high. Consequently, the groundwater flood risk in these areas is assessed as VERY LOW.

### Rivers

The river flood risk is VERY LOW for the next five days.

### Surface water

The surface water flood risk is VERY LOW for the next five days.

### Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

# Flood Guidance Statement

10:30hrs Thursday 26 March 2026

## Flood risk matrix

## Summary of potential impacts

### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible
