Steady

Minor surface water flooding impacts are possible but not expected on Tuesday in parts of England and Wales. The overall flood risk for England and Wales is VERY LOW for the next five days.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Minor surface water flooding impacts are possible but not expected on Tuesday in parts of England and Wales.

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

Rivers

The river flood risk is VERY LOW for the next five days.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

- MINIMAL**
Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces
- MINOR**
Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans
- SIGNIFICANT**
Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans
- SEVERE**
Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
