

Flood Guidance Statement

10:30hrs Tuesday 08 September 2026

Tuesday

8 Sep 2026 10:30-23:59

Trend since last FGS

Increased

Wednesday

9 Sep 2026

Steady

Thursday

10 Sep 2026

Steady

Friday

11 Sep 2026

Steady

Saturday

12 Sep 2026

Steady

Local minor surface water flooding is possible but not expected for parts of South East England today (Tuesday). The overall flood risk for England and Wales is VERY LOW for the next five days.

Assessment of flood risk

Surface water

Localised minor surface water flooding impacts are possible but not expected across parts of South East England today (Tuesday) due to locally heavy rain.

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Minimal coastal impacts are possible along some English and Welsh coasts on Friday and Saturday due to large spring tides. Impacts may include standing water on low-lying roads and coastal promenades.

Rivers

The river flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

- MINIMAL**
Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces
- MINOR**
Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans
- SIGNIFICANT**
Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans
- SEVERE**
Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible

Next statement due 10:30hrs Wednesday 09 September 2026 (all times are local)
