Steady

Minor surface water flooding impacts are possible but not expected on Monday and Tuesday. The overall flood risk for England and Wales is VERY LOW for the next five days.

Assessment of flood risk

Surface water

Local minor surface water flooding impacts are possible but not expected for parts of South East England later on Monday into early Tuesday. The surface water flood risk is VERY LOW for the next five days.

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Minimal coastal impacts are expected along some English and Welsh coasts from Monday to Wednesday due to high tides, storm surge and large waves. Impacts may include isolated spray on low-lying roads and coastal promenades.

Rivers

The river flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.
