Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Moderate surface water flooding impacts are possible for Cumbria on Friday (see areas of concern map) and possible but not expected in parts of Wales.

Moderate surface water impacts are possible but not expected for parts of England and Wales on Saturday.

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

Rivers

The river flood risk is VERY LOW for the next five days.

Moderate river flooding impacts are possible but not expected for parts of England and Wales on Friday and into early Saturday.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

- MINOR**
Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces
- MODERATE**
Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans
- SIGNIFICANT**
Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans
- EXTREME**
Danger to life, extreme disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible

Next statement due 10:30hrs Saturday 03 October 2026 (all times are local)
