Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Moderate surface water flooding impacts are possible in parts of England and Wales on Tuesday, with impacts possible but not expected more widely. See Specific Areas of Concern Map.

Impacts could include localised flooding from urban and fast responding smaller watercourses/catchments, drains, channels and flooding from overland flow.

Rivers

The river flood risk is VERY LOW for the next five days.

Moderate river flooding impacts are possible in parts of England and Wales on Tuesday, with impacts continuing for parts of the southwest of England into Wednesday. See Specific Areas of Concern Maps.

Moderate river flooding impacts are also possible but not expected more widely both days across England and Wales.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINOR
Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MODERATE
Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT
Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

EXTREME
Danger to life, extreme disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible

Next statement due **10:30hrs Tuesday 24 November 2026 (all times are local)**
